

Tired of being so patient with patient payments?

Introducing a
fast and simple
payment processing
feature for **Dentisoft**
users.

Start increasing cash flow, reduce your practice's collection efforts, and increase patient satisfaction with an integrated payment processing feature you can set-up and learn in minutes.

Accelerate Patient Payments. *Get Paid Faster!*

Payment Processing Integrated with Dentisoft

Benefits

- Increases your cash flow and lowers bad debt
- Satisfies patients & saves your staff time
- Reduces billing and collection expenses
- Reduces clerical errors and eliminates duplicate data entry
- You can get started in minutes – for only the cost of a \$75 card reader!

Features

- Processes major credit and debit cards (VISA®, MasterCard®, American Express® and Discover)
- Supports direct debit from patient's checking or savings account and converts paper checks to electronic funds transfers
- Easily set up automatic recurring payment plans
- Save a form of payment for future transactions and billing
- Integrated within Dentisoft Office Online - no separate terminal or phone lines required
- Payments are automatically posted to the patient ledger
- Protects patient information to minimize the risk of lost or stolen account data and potential for identity theft
- Generate detailed transaction reports 24/7, right from your desktop

PAYMENT INFORMATION

Amount to be Charged \$

Do you want split this amount into monthly installments? Yes No

Do you want to process the payment now or get authorization from the patient to charge the credit card later? Now Later

Card on File - Store a patient's bank account or credit card information to collect a one-time payment or for future use against post-insurance balances. Card on File is convenient if you have patients who visit often, but do not want to write a check or give you a credit card every time they visit. With the system-generated authorization form, obtaining a patient's approval for payment is fast and hassle-free.

Store patient payment information securely for use in future payments

Schedule Payments - In the event a patient cannot pay the total amount due at time of service, the system lets you split that amount into smaller payments that the patient can afford.

Set up automated patient installment plans for larger balances to reduce monthly billing and collection tasks
